Safari Ajabu

9 DAY ITINERARY

'Ajabu' is the Swahili word for wonderful or amazing and in partnership with Lemala and Wellworth camps and lodges we have created this amazing and exciting dry season tour combining luxury with an authentic safari experience.

The beauty of the savannah, plains and crater can be appreciated all year round but between July and October is when the migration reaches fever pitch and offers the best chance to witness the tens of thousands of wildebeest, zebras and gazelles stampede back and forth across the Mara River in search of the fresh short grasses. On our way north we will visit the elephants of Tarangire and the large cats of the Central Serengeti.

After each exciting game drive, our select 5-star lodges are set to relax you with sunsets, cocktails, camp fires, a superb dinner and a good night's sleep; getting ready for the next day's adventure.

This area is crossed by the thrilling spectacle of the annual migration.

The Central Serengeti also has high-density game-viewing at all times and is well-known for its large concentration of cats, so much so that until recently this area was set aside for scientific research into predators, especially cheetah.

This Luxury Camp is ideally located within Central Serengeti. The Rooms offer guests a 180-degree view from their bed or while enjoying their meal or drinks on the verandas to bring them as close to the nature as possible. These stunning views embrace Acacia Tortillis Trees with an abundance of animals in the vicinity.

Now is the time to be in this exciting arena as thousands of wildebeest, zebras and gazelles will be edging to the river banks until the pressure is so strong behind that they launch themselves into the river to follow the fresh grass.

Ole Serai Kogatende Luxury Camp is strategically located in a prime area of the northern Serengeti along the path of the great migration, sparsely inhabited by large Acacia and Tortilis Tree's. It is also home to several species of wildlife that reside in this area year round due to catchments of water bodies close by.
